

Who we worked with:

Big Green Door Ltd

www.biggreendoor.co.uk

When:

2001 – now

What we did:

Consultation

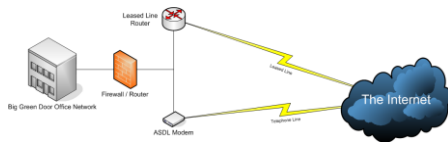

Development

Co-Lo

Leased line connectivity

Consultancy & Strategy

Big Green Door came to us needing to provide streaming video to their clients. We suggested that they use off the shelf video conferencing equipment coupled with a leased line to the internet.

We suggested a partner to provide the leased line connectivity to them and then project managed the purchase, installation and commissioning of the high bandwidth leased line.

They also have an adsl line to provide backup internet services in the unlikely event that the leased line were to fail.

We currently provide networking support to them to help them get the most from this resource and to manage the firewall and routing.
